Event Programme

A commercial document aimed at introducing any type of industry gathering. This generally includes: date, location, event agenda, highlights, speakers presentation, exhibitors list, registration form, who should attend, etc.

Product Brochure

A document featuring a specific product or range of products for a given company. Used mainly for advertising purposes, it gives a general description of the product, and clearly states the company brand and name.

Product Catalogue

A document that lists a series of products for one company. It typically includes a large number of photos, with minimal detail for each product. The catalogue will clearly state the company brand and name. This document type caters to those who need to promote a large range of products (rather than just one product) in a visually attractive manner. It is also useful when promoting an extensive range of packaging types and designs.

Product Presentation

A document that gives a brief summary of a product for a given company. Like the product brochure, it is used mainly for advertising purposes - giving a general description of the product, and clearly stating the company brand and name. The difference from the Product Presentation, however, is the format. It will be similar to that of a PowerPoint rather than a word document.

Best Practices

Title

Your page title is shown on search engine results pages, browser tabs and when shared across social media platforms. The title is taken into consideration by search engines when determining your page ranking.

Consider the following best practices:

- Ensure the title informs the user of what is on the page in a clear and concise manner
- Choose a main keyword that is relevant to your page
- Include your keyword at the beginning of your title
- Avoid repeating, listing or using different variations of your keyword

Description

Your description should inform the user of what they are receiving in return for their data. This also gives your content more viewability in organic search rankings.

Consider the following best practices:

- Include your keyword in the text
- Keep it short, sweet, and to the point
- Make your copy as relevant as possible
